

If you're using Apple's IOS 8, one or both of the following options will allow you to continue to login to online and/or mobile banking to access your First National Bank Alaska account information:

- 1) For your laptop computer and/or mobile iPad or iPhone device, you may download the Google Chrome browser from the Apple store to easily login to online banking.
- 2) For your iPhone, download First National's free online banking app, FNBAApp, to login to your account regardless of the operating system on the iPhone. (FNBAApp does not work on iPad devices.)

If you need help with resetting your password or experience other online banking issues, please call 777-4FNB or 1-800-856-4FNB (4362) if calling outside of Anchorage or Eagle River.
